

THE SALPN IS MOVING:

The SALPN will be relocating prior to January 1st, 2018 to 2208 Victoria Avenue East, Regina. The new space was leased in shell condition and the interior is currently under construction. The space will be larger and support growth of the organization and has been designed with efficiency and protection of confidential information as priorities. All costs related to the development of the office will be funded with the reserves established by SALPN and will not require financing.

The health and wellness of our staff, Council and visitors are important to us. The current location continues to pose both environmental and health risks to those in the building. With those considerations and the ongoing financial uncertainty of the building owner, the SALPN is confident that our future relocation is in the best interest of the organization. We look forward to serving the public and welcoming LPNs and Stakeholders to our new location.

Stay tuned for further updates
